

Remote

The Magnum Remote is designed to be simple to use while offering full menu features for set-up.

Easy-to-read: The large LCD screen and at-a-glance LEDs display the inverter/charger status in a straightforward way. Soft keys give simple access to menus and a rotary encoder knob makes it easy to quickly scroll through menus and select settings.

Non-volatile memory: Critical settings are saved even if the power is disconnected.

No cross platform confusion: The ME-RC remote is the same remote used on all Magnum inverter/charger models in the ME, MS, RD, MM, and the MMS Series lines.

Multiple functional settings: The Remote offers multiple functions in one place, including: inverter on/off, charger on/off, shore power breaker settings, AGS control, meter button, setup, and technical menus.

Adjustable settings include shore power input from 5 to 60 amps; AGS settings for voltage, temperature, quiet time, clock, and status; inverter and charger settings for search watts, battery bank size, battery type, charge rate, VAC dropout, contrast, and power saver; and tech settings for battery temperature, transformer and internal FETs, software revisions, and factory reset.

A standard 50' 4-wire, twisted pair cable allows for plenty of room to display the Remote with ease.

MODEL NUMBERS:

- ME-RC50

WORKS WITH:

	Page
