Magnum Energy Introduces MS4024 Sine Wave Inverter/Charger

Everett, WA - Magnum Energy introduces the MS4024 MagnaSine Pure Sine Wave Inverter/Charger. The MS4024 is rated at 4000 watt continuous output with a 105 Amp Power Factor corrected charger. The MS series also can be series stacked for 120/240 volt operation. MagnaSine is produced on the same platform and uses the same remote panels and accessories as their popular ME and RD series modified sine wave inverter/chargers. Using a standard platform for all models incorporates cost savings that provides a low cost pure sine wave inverter/charger. This also allows manufacturers to easily offer pure sine wave inverter/chargers as an option or upgrade to standard models since all mechanical and wiring connections are the same as the popular ME series.

MagnaSine Series is available in 12 volt input at 2000 watts (MS2012), 2800 watts (MS2812) and in 24 volt input at 4000 watts (MS4024) Automatic Generator Start option is also available and allows the generator to start based on low battery voltage or temperature for air conditioner operation.

ABOUT MAGNUM ENERGY

Magnum Energy is a leading manufacturer of premium inverter/chargers for RV, Marine, Truck and Renewable Energy markets. With over 70 years of combined inverter design and manufacturing experience, Magnum Energy has incorporated new design and manufacturing techniques to build some of the industries most reliable and advanced inverter/chargers.
